Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Navier-Stokes Analysis for High-Speed Flows Using Pressure Correction Algorithm B88-082
Double-Multiple Streamtube Model for Studying Vertical-Axis Wind Turbines B88-054
Transonic Inlet/Nacelle Code B88-034
Experimental Study of End-Wall Flow in a Compressor Cascade B88-021
Blade Tip, Finite Aspect Ratio, and Dynamic Stall Effects on the Darrieus Rotor B88-010

Aeroelasticity

Recent Developments in Flutter Suppression Techniques for Turbomachinery Rotors B88-022

Fuels and Fuel Systems

Experimental and Theoretical Effects of Nitrogen Gas Flow Rate on Liquid-Jet Atomization B88-059
Influence of Fuel Temperature on Atomization Performance of Pressure-Swirl Atomizers B88-030

General Aviation

Experimental Study of End-Wall Flow in a Compressor Cascade B88-021

Noise

Mixing of an Underexpanded Rectangular Jet Ejector B88-035

Performance

Performance Experiments with a Shock-Tunnel-Driven Argon-Cesium MHD Disk Generator B88-053

Propeller and Rotor Systems

Experimental and Numerical Investigation of a Propeller with Three-Dimensional Inflow B88-050
Numerical Navier-Stokes Solutions of High-Speed Propeller Flows B88-043

Subsystem Design

Highly Compact Inlet Diffuser Technology B88-081

Energy

Alternate Fuels

Influence of Fuel Temperature on Atomization Performance of Pressure-Swirl Atomizers B88-030
Effects of Additives on the Microexplosion of Carbon Slurry Droplets B88-029
Current Gas Turbine Combustion and Fuels Research and Development B88-026

Combustion

Three-Dimensional Laser Velocimeter Investigation of Turbulent, Incompressible Flow in an Axisymmetric Sudden Expansion B88-078
Representation of Average Drop Sizes in Sprays B88-073
Numerical Model for Pellet-Dispersion Igniter Systems B88-060
LDV Measurements of Axial Drop Velocity in Evaporating, Dense Sprays B88-058
Modeling of a Hollow-Cone Liquid Spray Including Droplet Collisions B88-057
Combustion-Generated Turbulence in Practical Combustors B88-056
Experimental and Theoretical Study of a Monodisperse Spray B88-045
Spray Characteristics of Aerated-Liquid Pressure Atomizers B88-044
Rotation Effects on Axisymmetric Sudden-Expansion Flows B88-037
Influence of Fuel Temperature on Atomization Performance of Pressure-Swirl Atomizers B88-030
Effects of Additives on the Microexplosion of Carbon Slurry Droplets B88-029
Current Gas Turbine Combustion and Fuels Research and Development B88-026
Two-Dimensional Model of the Plasma Thruster B88-017
Pulverized Fuel Combustion in a Turbulent Round Jet Burner B88-013
Soot Loading in a Generic Gas Turbine Combustor B88-012
Combustion of Ammonium Perchlorate and Various Inorganic Additives B88-004
Ignition and Flame Propagation in Dilute Polydisperse Sprays; Importance of d_{32} and d_{20} B88-002
Flame Stabilization Using Large Flameholders of Irregular Shape B88-001

Conservation

Experimental Evaluation of Hydraulic Accumulator Efficiency With and Without Elastomeric Foam B88-025

Magnetohydrodynamics

Laser Velocimetry Measurements at the Diffuser Exit of a Coal-Fired MHD Channel B88-083
Performance Experiments with a Shock-Tunnel-Driven Argon-Cesium MHD Disk Generator B88-053
Steady-State MPD Arc Thruster with a Permanent Magnet B88-041
Ionization Relaxation Region in a Nonequilibrium Disk MHD Generator B88-038
Short Fault in Supersonic Faraday-Type MHD Generators B88-024
Improving Far-Infrared Laser Measurements of MHD Plasma Electron Density and Conductivity B88-009
Unsteady Discharge and Fluid Flow in a Closed-Cycle Disk MHD Generator B88-008

Microwaves

Electrothermal Propulsion of Spacecraft with Millimeter and Submillimeter Electromagnetic Energy B88-049

Nuclear Fission

Load-Following and Reliability Studies of an Integrated SP-100 System B88-020

Nuclear Fusion

Future Spacecraft Propulsion B88-076

Photovoltaic Power

Dendritic Web Silicon Solar Cells B88-086

Rotating Machinery

Stability of Rotors in Compressible Fluid-Film Bearings B88-063
Calculation of Unsteady Wake/Rotor Interaction B88-052
Three-Dimensional Flow in Deep Rotating Stall Cells of an Axial Compressor B88-036
Complex Modal Balancing of Flexible Rotors Including Residual Bow B88-033

Solar Power Satellites

Dendritic Web Silicon Solar Cells B88-086

Thermoelectric

Load-Following and Reliability Studies of an Integrated SP-100 System B88-020

Wind Power

Aerodynamic Analysis of the Darrieus Wind Turbines Including Dynamic-Stall Effects B88-068
Double-Multiple Streamtube Model for Studying Vertical-Axis Wind Turbines B88-054
Blade Tip, Finite Aspect Ratio, and Dynamic Stall Effects on the Darrieus Rotor B88-010

Fluid Dynamics

Aeroacoustics

Mixing of an Underexpanded Rectangular Jet Ejector B88-035

Boundary Layers and Convective Heat Transfer-Turbulent

Electric Arc Behavior in a Boundary Layer B88-067
Rotation Effects on Axisymmetric Sudden-Expansion Flows B88-037

Computational Methods

Direct Optimization Method for Estimation of Supersonic Flow Turbine Stator Profiles B88-085
Prediction of Leakage Mass Flow Rate Through Gas Springs B88-084

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Navier-Stokes Analysis for High-Speed Flows Using Pressure Correction Algorithm B88-082
Double-Multiple Streamtube Model for Studying Vertical-Axis Wind Turbines B88-054
Transonic Inlet/Nacelle Code B88-034
Experimental Study of End-Wall Flow in a Compressor Cascade B88-021
Blade Tip, Finite Aspect Ratio, and Dynamic Stall Effects on the Darrieus Rotor B88-010

Aeroelasticity

Recent Developments in Flutter Suppression Techniques for Turbomachinery Rotors B88-022

Fuels and Fuel Systems

Experimental and Theoretical Effects of Nitrogen Gas Flow Rate on Liquid-Jet Atomization B88-059
Influence of Fuel Temperature on Atomization Performance of Pressure-Swirl Atomizers B88-030

General Aviation

Experimental Study of End-Wall Flow in a Compressor Cascade B88-021

Noise

Mixing of an Underexpanded Rectangular Jet Ejector B88-035

Performance

Performance Experiments with a Shock-Tunnel-Driven Argon-Cesium MHD Disk Generator B88-053

Propeller and Rotor Systems

Experimental and Numerical Investigation of a Propeller with Three-Dimensional Inflow B88-050
Numerical Navier-Stokes Solutions of High-Speed Propeller Flows B88-043

Subsystem Design

Highly Compact Inlet Diffuser Technology B88-081

Energy

Alternate Fuels

Influence of Fuel Temperature on Atomization Performance of Pressure-Swirl Atomizers B88-030
Effects of Additives on the Microexplosion of Carbon Slurry Droplets B88-029
Current Gas Turbine Combustion and Fuels Research and Development B88-026

Combustion

Three-Dimensional Laser Velocimeter Investigation of Turbulent, Incompressible Flow in an Axisymmetric Sudden Expansion B88-078
Representation of Average Drop Sizes in Sprays B88-073
Numerical Model for Pellet-Dispersion Igniter Systems B88-060
LDV Measurements of Axial Drop Velocity in Evaporating, Dense Sprays B88-058
Modeling of a Hollow-Cone Liquid Spray Including Droplet Collisions B88-057
Combustion-Generated Turbulence in Practical Combustors B88-056
Experimental and Theoretical Study of a Monodisperse Spray B88-045
Spray Characteristics of Aerated-Liquid Pressure Atomizers B88-044
Rotation Effects on Axisymmetric Sudden-Expansion Flows B88-037
Influence of Fuel Temperature on Atomization Performance of Pressure-Swirl Atomizers B88-030
Effects of Additives on the Microexplosion of Carbon Slurry Droplets B88-029
Current Gas Turbine Combustion and Fuels Research and Development B88-026
Two-Dimensional Model of the Plasma Thruster B88-017
Pulverized Fuel Combustion in a Turbulent Round Jet Burner B88-013
Soot Loading in a Generic Gas Turbine Combustor B88-012
Combustion of Ammonium Perchlorate and Various Inorganic Additives B88-004
Ignition and Flame Propagation in Dilute Polydisperse Sprays; Importance of d_{32} and d_{20} B88-002
Flame Stabilization Using Large Flameholders of Irregular Shape B88-001

Conservation

Experimental Evaluation of Hydraulic Accumulator Efficiency With and Without Elastomeric Foam B88-025

Magnetohydrodynamics

Laser Velocimetry Measurements at the Diffuser Exit of a Coal-Fired MHD Channel B88-083
Performance Experiments with a Shock-Tunnel-Driven Argon-Cesium MHD Disk Generator B88-053
Steady-State MPD Arc Thruster with a Permanent Magnet B88-041
Ionization Relaxation Region in a Nonequilibrium Disk MHD Generator B88-038
Short Fault in Supersonic Faraday-Type MHD Generators B88-024
Improving Far-Infrared Laser Measurements of MHD Plasma Electron Density and Conductivity B88-009
Unsteady Discharge and Fluid Flow in a Closed-Cycle Disk MHD Generator B88-008

Microwaves

Electrothermal Propulsion of Spacecraft with Millimeter and Submillimeter Electromagnetic Energy B88-049

Nuclear Fission

Load-Following and Reliability Studies of an Integrated SP-100 System B88-020

Nuclear Fusion

Future Spacecraft Propulsion B88-076

Photovoltaic Power

Dendritic Web Silicon Solar Cells B88-086

Rotating Machinery

Stability of Rotors in Compressible Fluid-Film Bearings B88-063
Calculation of Unsteady Wake/Rotor Interaction B88-052
Three-Dimensional Flow in Deep Rotating Stall Cells of an Axial Compressor B88-036
Complex Modal Balancing of Flexible Rotors Including Residual Bow B88-033

Solar Power Satellites

Dendritic Web Silicon Solar Cells B88-086

Thermoelectric

Load-Following and Reliability Studies of an Integrated SP-100 System B88-020

Wind Power

Aerodynamic Analysis of the Darrieus Wind Turbines Including Dynamic-Stall Effects B88-068
Double-Multiple Streamtube Model for Studying Vertical-Axis Wind Turbines B88-054
Blade Tip, Finite Aspect Ratio, and Dynamic Stall Effects on the Darrieus Rotor B88-010

Fluid Dynamics

Aeroacoustics

Mixing of an Underexpanded Rectangular Jet Ejector B88-035

Boundary Layers and Convective Heat Transfer-Turbulent

Electric Arc Behavior in a Boundary Layer B88-067
Rotation Effects on Axisymmetric Sudden-Expansion Flows B88-037

Computational Methods

Direct Optimization Method for Estimation of Supersonic Flow Turbine Stator Profiles B88-085
Prediction of Leakage Mass Flow Rate Through Gas Springs B88-084

Navier-Stokes Analysis for High-Speed Flows Using Pressure Correction Algorithm B88-082
Two-Dimensional Numerical Analysis for Inlets at Subsonic Through Hypersonic Speeds B88-080
Stability of Rotors in Compressible Fluid-Film Bearings B88-063
Calculation of Unsteady Wake/Rotor Interaction B88-052
Experimental and Theoretical Study of a Monodisperse Spray B88-045
Numerical Navier-Stokes Solutions of High-Speed Propeller Flows B88-043
Computation of Three-Dimensional Transonic Inlet Flowfields Using an Approximate Factorization Algorithm B88-040
Transonic Inlet/Nacelle Code B88-034
Calculation of Annular Nozzle Trisonic Flowfields by the Method of Characteristics B88-031
Comparison of Computational Methods for Three-Dimensional Turbulent Turbomachinery Flows B88-027

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Second Solution and the Second Law B88-088
Analysis of Rotor Tip Clearance Loss in Axial-Flow Turbines B88-065
Mixing Characteristics of a Ducted Elliptical Jet B88-048
Numerical Navier-Stokes Solutions of High-Speed Propeller Flows B88-043
Mixing of an Underexpanded Rectangular Jet Ejector B88-035
Flow Visualization Study of Tip Leakage Flows Across Cantilevered Stator Blades B88-019

Multiphase Flows

Numerical Study of the Interactions Between Droplets at Intermediate Reynolds Numbers B88-072
Numerical Model for Pellet-Dispersion Igniter Systems B88-060
Experimental and Theoretical Effects of Nitrogen Gas Flow Rate on Liquid-Jet Atomization B88-059
LDV Measurements of Axial Drop Velocity in Evaporating, Dense Sprays B88-058
Modeling of a Hollow-Cone Liquid Spray Including Droplet Collisions B88-057
Experimental and Theoretical Study of a Monodisperse Spray B88-045
Two-Dimensional Model of the Plasma Thruster B88-017
Pulverized Fuel Combustion in a Turbulent Round Jet Burner B88-013
Ignition and Flame Propagation in Dilute Polydisperse Sprays; Importance of d_{32} and d_{20} B88-002

Nonsteady Aerodynamics

Aerodynamic Analysis of the Darrieus Wind Turbines Including Dynamic-Stall Effects B88-068
Wake-Induced Unsteady Aerodynamic Interactions in a Multistage Compressor B88-066
Control of Rotor Aerodynamically Forced Vibrations by Splitters B88-064
Three-Dimensional Flow in Deep Rotating Stall Cells of an Axial Compressor B88-036
Vortex Shedding in High-Speed Compressor Blade Wakes B88-032

Nozzle and Channel Flow

Second Solution and the Second Law B88-088
Direct Optimization Method for Estimation of Supersonic Flow Turbine Stator Profiles B88-085
Forced Mixer Lobes in Ejector Designs B88-051
Calculation of Annular Nozzle Trisonic Flowfields by the Method of Characteristics B88-031
Calculation of Three-Dimensional Inviscid Flowfields in Propulsive Nozzles with Centerbodies B88-023
Experimental Study of End-Wall Flow in a Compressor Cascade B88-021

Plasmadynamics and MHD

Laser Velocimetry Measurements at the Diffuser Exit of a Coal-Fired MHD Channel B88-083
Onset in Magnetoplasmadynamic Thrusters with Finite-Rate Ionization B88-077
Electric Arc Behavior in a Boundary Layer B88-067
Current Distribution and Plasma Acceleration in MPD Arcjets with Applied Magnetic Fields B88-062
Performance Experiments with a Shock-Tunnel-Driven Argon-Cesium MHD Disk Generator B88-053
Short Fault in Supersonic Faraday-Type MHD Generators B88-024

Subsonic Flow

Highly Compact Inlet Diffuser Technology B88-081

Supersonic and Hypersonic Flow

Laser-Induced-Fluorescence Visualization of Transverse Gaseous Injection in a Nonreacting Supersonic Combustor B88-087
Navier-Stokes Analysis for High-Speed Flows Using Pressure Correction Algorithm B88-082
Two-Dimensional Numerical Analysis for Inlets at Subsonic Through Hypersonic Speeds B88-080
Onset in Magnetoplasmadynamic Thrusters with Finite-Rate Ionization B88-077

Transonic Flow

Transonic Inlet/Nacelle Code B88-034

Interdisciplinary Topics

Analytical and Numerical Methods

Optimization of Electric Propulsion Systems Considering Specific Power as Function of Specific Impulse B88-075
Simple Finite-Element Model of O-Ring Deformation and Activation During Squeeze and Pressurization B88-074

Computer Software

PC-Based Data Acquisition Control System for Direct-Connect Test Stands B88-042

Lasers and Laser Applications

Laser Velocimetry Measurements at the Diffuser Exit of a Coal-Fired MHD Channel B88-083
Representation of Average Drop Sizes in Sprays B88-073
Improving Far-Infrared Laser Measurements of MHD Plasma Electron Density and Conductivity B88-009

Research Facilities and Instrumentation

PC-Based Data Acquisition Control System for Direct-Connect Test Stands B88-042

Launch Vehicle and Missile (LV/M) Technology

Mission Studies and Economics

Life-Cycle-Cost Considerations for Launch Vehicle Liquid Propellant Rocket Engine B88-016

Propulsion and Propellant Systems

Numerical Model for Pellet-Dispersion Igniter Systems B88-060
Experimental Evaluation of Hydraulic Accumulator Efficiency With and Without Elastomeric Foam B88-025
Life-Cycle-Cost Considerations for Launch Vehicle Liquid Propellant Rocket Engine B88-016

Structural Design (including Loads)

Simple Finite-Element Model of O-Ring Deformation and Activation During Squeeze and Pressurization B88-074
Structural Behavior of the Space Shuttle SRM Tang-Clevis Joint B88-047

Marine Technology

Propulsion

Experimental and Numerical Investigation of a Propeller with Three-Dimensional Inflow B88-050
Experimental Evaluation of Hydraulic Accumulator Efficiency With and Without Elastomeric Foam B88-025

Propulsion

Airbreathing Propulsion

Second Solution and the Second Law B88-088
Laser-Induced-Fluorescence Visualization of Transverse Gaseous Injection in a Nonreacting Supersonic Combustor B88-087
Direct Optimization Method for Estimation of Supersonic Flow Turbine Stator Profiles B88-085
Highly Compact Inlet Diffuser Technology B88-081
Two-Dimensional Numerical Analysis for Inlets at Subsonic Through Hypersonic Speeds B88-080
Turbine-Stage Heat Transfer: Comparison of Short-Duration Measurements with State-of-the-Art Predictions B88-079
Wake-Induced Unsteady Aerodynamic Interactions in a Multistage Compressor B88-066
Analysis of Rotor Tip Clearance Loss in Axial-Flow Turbines B88-065
Control of Rotor Aerodynamically Forced Vibrations by Splitters B88-064
Stability of Rotors in Compressible Fluid-Film Bearings B88-063
Combustion-Generated Turbulence in Practical Combustors B88-056

Mixing Characteristics of a Ducted Elliptical Jet B88-048
PC-Based Data Acquisition Control System for Direct-Connect Test Stands B88-042
Computation of Three-Dimensional Transonic Inlet Flowfields Using an Approximate Factorization Algorithm B88-040
Rotation Effects on Axisymmetric Sudden-Expansion Flows B88-037
Three-Dimensional Flow in Deep Rotating Stall Cells of an Axial Compressor B88-036
Vortex Shedding in High-Speed Compressor Blade Wakes B88-032
Calculation of Annular Nozzle Trisonic Flowfields by the Method of Characteristics B88-031
Combustion Processes in Supersonic Flow B88-028
Recent Developments in Flutter Suppression Techniques for Turbomachinery Rotors B88-022
Determination of Compressor In-Stall Characteristics from Engine Surge Transients B88-018
Soot Loading in a Generic Gas Turbine Combustor B88-012
Transient Engine Performance with Water Ingestion B88-011
Flowfield in a Dual-Inlet Side-Dump Combustor B88-007
Ignition and Flame Propagation in Dilute Polydisperse Sprays; Importance of d_{32} and d_{20} B88-002
Flame Stabilization Using Large Flameholders of Irregular Shape B88-001

Combustion and Combustor Designs

Laser-Induced-Fluorescence Visualization of Transverse Gaseous Injection in a Nonreacting Supersonic Combustor B88-087
Three-Dimensional Laser Velocimeter Investigation of Turbulent, Incompressible Flow in an Axisymmetric Sudden Expansion B88-078
Numerical Study of the Interactions Between Droplets at Intermediate Reynolds Numbers B88-072
Experimental and Theoretical Effects of Nitrogen Gas Flow Rate on Liquid-Jet Atomization B88-059
Combustion-Generated Turbulence in Practical Combustors B88-056
Influence of Design Concept and Liquid Properties on Fuel Injector Performance B88-055
Spray Characteristics of Aerated-Liquid Pressure Atomizers B88-044
Combustion Processes in Supersonic Flow B88-028
Current Gas Turbine Combustion and Fuels Research and Development B88-026
Active Control of Solid Propellant Consumption Rate by Forced Cone Burning B88-014
Flowfield in a Dual-Inlet Side-Dump Combustor B88-007
DC Arc Discharge Ignition and Combustion Control of Solid Propellants B88-005
Formulation Effects on the Burning Rate of Aluminized Solid Propellants B88-003
Flame Stabilization Using Large Flameholders of Irregular Shape B88-001

Combustion Stability, Ignition, and Detonation

Pulsed Instability in Rocket Motors: A Comparison Between Predictions and Experiments B88-046
Harmonic Analysis of Piston and Pyrotechnic Pulsers for T-burners B88-039
Combustion of Ammonium Perchlorate and Various Inorganic Additives B88-004

Electric and Advanced Space Propulsion

Onset in Magnetoplasmadynamic Thrusters with Finite-Rate Ionization B88-077
Current Distribution and Plasma Acceleration in MPD Arcjets with Applied Magnetic Fields B88-062
Electrothermal Propulsion of Spacecraft with Millimeter and Submillimeter Electromagnetic Energy B88-049
Steady-State MPD Arc Thruster with a Permanent Magnet B88-041

Engine Control

Determination of Compressor In-Stall Characteristics from Engine Surge Transients B88-018

Engine Performance

Analysis of Rotor Tip Clearance Loss in Axial-Flow Turbines B88-065
Vortex Shedding in High-Speed Compressor Blade Wakes B88-032
Combustion Processes in Supersonic Flow B88-028
Flow Visualization Study of Tip Leakage Flows Across Cantilevered Stator Blades B88-019
Determination of Compressor In-Stall Characteristics from Engine Surge Transients B88-018

Environmental Effects

Soot Loading in a Generic Gas Turbine Combustor B88-012

Fuels and Propellants, Properties of

Influence of Design Concept and Liquid Properties on Fuel Injector Performance B88-055
Spray Characteristics of Aerated-Liquid Pressure Atomizers B88-044
Effects of Additives on the Microexplosion of Carbon Slurry Droplets B88-029
Combustion of Ammonium Perchlorate and Various Inorganic Additives B88-004
Formulation Effects on the Burning Rate of Aluminized Solid Propellants B88-003

Liquid Rocket Engines and Missile Systems

Life-Cycle-Cost Considerations for Launch Vehicle Liquid Propellant Rocket Engine B88-016
Life-Cycle-Cost Methodology for the Space Station Propulsion System B88-015
Flowfield in a Dual-Inlet Side-Dump Combustor B88-007
Thruster Requirements and Concerns for Bipropellant Blowdown Systems B88-006

Propulsion for Marine Application

Experimental and Numerical Investigation of a Propeller with Three-Dimensional Inflow B88-050

Solid and Hybrid Rocket Engines

Thrust Modulation in Hybrid Rocket Engines B88-061
Structural Behavior of the Space Shuttle SRM Tang-Clevis Joint B88-047
Pulsed Instability in Rocket Motors: A Comparison Between Predictions and Experiments B88-046
Harmonic Analysis of Piston and Pyrotechnic Pulsers for T-burners B88-039

Spacecraft Technology

Electric Power

Load-Following and Reliability Studies of an Integrated SP-100 System B88-020

Mission Analysis

Future Spacecraft Propulsion B88-076

Missions and Economics

Life-Cycle-Cost Methodology for the Space Station Propulsion System B88-015

Propulsion Systems Integration

Future Spacecraft Propulsion B88-076

Space Station Systems, Manned

Life-Cycle-Cost Methodology for the Space Station Propulsion System B88-015

Structural Mechanics and Materials

Aeroelasticity and Hydroelasticity

Wake-Induced Unsteady Aerodynamic Interactions in a Multistage Compressor B88-066
Control of Rotor Aerodynamically Forced Vibrations by Splitters B88-064
Recent Developments in Flutter Suppression Techniques for Turbomachinery Rotors B88-022

Structural Dynamics

Simple Finite-Element Model of O-Ring Deformation and Activation During Squeeze and Pressurization B88-074

Structural Statics

Structural Behavior of the Space Shuttle SRM Tang-Clevis Joint B88-047

Chronological Index

B88-001 Flame Stabilization Using Large Flameholders of Irregular Shape. R. M. Stwalley III and A. H. Lefebvre, *Purdue University* (4, 1, p. 4) Article

B88-002 Ignition and Flame Propagation in Dilute Polydisperse Sprays; Importance of d_{32} and d_{20}. Suresh K. Aggarwal, *The University of Illinois at Chicago* (4, 1, p. 14) Article based on AIAA Paper 86-1525

B88-003 Formulation Effects on the Burning Rate of Aluminized Solid Propellants. An-Lu Leu and Ru-Jau Wu, *Chung Cheng Institute of Technology, Taiwan, ROC* (4, 1, p. 22) Article

B88-004 Combustion of Ammonium Perchlorate and Various Inorganic Additives. T. L. Boggs, D. E. Zurn, H. F. Cordes and J. Covino, *U. S. Naval Weapons Center* (4, 1, p. 27) Article Errata (4, 5, p. 478)

B88-005 DC Arc Discharge Ignition and Combustion Control of Solid Propellants. Takeshi Tachibana, *Kyushu Institute of Technology, Japan;* and Itsuro Kimura, *Tokai University, Japan.* (4, 1, p. 41) Article

B88-006 Thruster Requirements and Concerns for Bipropellant Blowdown Systems. H. C. Hearn, *Lockheed Missiles & Space Company* (4, 1, p. 47) Article

B88-007 Flowfield in a Dual-Inlet Side-Dump Combustor. T-M. Liou and S-M. Wu, *National Tsing Hua University, Taiwan, ROC* (4, 1, p. 53) Article

B88-008 Unsteady Discharge and Fluid Flow in a Closed-Cycle Disk MHD Generator. Y. Okuno, H. Yamasaki, S. Kabashima and S. Shioda, *Tokyo Institute of Technology, Japan* (4, 1, p. 61) Article

B88-009 Improving Far-Infrared Laser Measurements of MHD Plasma Electron Density and Conductivity. Mitsuharu Masuda, Yukio Watanabe, Hironori Nakamuta, Tomoaki Ikegami, and Masanori Akazak, *Kyushu University, Japan* (4, 1, p. 68) Article

B88-010 Blade Tip, Finite Aspect Ratio, and Dynamic Stall Effects on the Darrieus Rotor. I. Paraschivoiu, P. Désy and C. Masson, *Ecole Polytechnique de Montréal, Canada* (4, 1, p. 73) Article

B88-011 Transient Engine Performance with Water Ingestion. T. Haykin and S. N. B. Murthy, *Purdue University* (4, 1, p. 81) Article based on AIAA Paper 86-1621

B88-012 Soot Loading in a Generic Gas Turbine Combustor. W. A. Eckerle, *Clarkson University;* and T. J. Rosfjord, *United Technologies Research Center* (4, 1, p. 89) Article based on AIAA Paper 87-0297

B88-013 Pulverized Fuel Combustion in a Turbulent Round Jet Burner. S. M. Masutani, S. Azuhata, H. Miyadera and Y. Hishinuma, *Hitachi Research Laboratory, Japan* (4, 2, p. 97) Article based on AIAA Paper 87-0299

B88-014 Active Control of Solid Propellant Consumption Rate by Forced Cone Burning. P. C. Winch and R. D. Irvine, *Defence Science and Technology Organisation, South Australia* (4, 2, p. 104) Article based on AIAA Paper 86-1710

B88-015 Life-Cycle-Cost Methodology for the Space Station Propulsion System. Claus J. Meisl, *Rockwell International* (4, 2, p. 111) Article based on AIAA Paper 86-1405

B88-016 Life-Cycle-Cost Considerations for Launch Vehicle Liquid Propellant Rocket Engine. Claus J. Meisl, *Rockwell International* (4, 2, p. 118) Article based on AIAA Paper 86-1408

B88-017 Two-Dimensional Model of the Plasma Thruster. Won-Taek Park and Duk-In Choi, *Korea Advanced Institute of Science and Technology, South Korea* (4, 2, p. 127) Article

B88-018 Determination of Compressor In-Stall Characteristics from Engine Surge Transients. Carl F. Lorenzo, Francis P. Chiaramonte and Charles M. Mehalic, *NASA Lewis Research Center* (4, 2, p. 133) Article based on AIAA Paper 84-1206

B88-019 Flow Visualization Study of Tip Leakage Flows Across Cantilevered Stator Blades. Nathan G. Adams, *Garrett Turbine Engine Company*; and H. Kent Hepworth, *Northern Arizona University* (4, 2, p. 144) Article based on AIAA Paper 85-1136

B88-020 Load-Following and Reliability Studies of an Integrated SP-100 System. Mohamed S. El-Genk, Jong T. Seo, and John J. Buksa, *University of New Mexico* (4, 2, p. 152) Article

B88-021 Experimental Study of End-Wall Flow in a Compressor Cascade. D. Tao, *Beijing Institute of Aeronautics and Astronautics, China*; and C. Wang, *Tsinghua University, China* (4, 2, p. 157) Article

B88-022 Recent Developments in Flutter Suppression Techniques for Turbomachinery Rotors. O. O. Bendiksen, *Princeton University* (4, 2, p. 164) Article

B88-023 Calculation of Three-Dimensional Inviscid Flowfields in Propulsive Nozzles with Centerbodies. David L. Marcum and Joe D. Hoffman, *Purdue University* (4, 2, p. 172) Article based on AIAA Paper 86-0449

B88-024 Short Fault in Supersonic Faraday-Type MHD Generators. Motoo Ishikawa, Makoto Nakamura and Juro Umoto, *Kyoto University, Japan* (4, 2, p. 180) Article

B88-025 Experimental Evaluation of Hydraulic Accumulator Efficiency With an Without Elastomeric Foam. A. Pourmovahed, *General Motors Research Laboratories;* S. A. Baum, F. J. Fronczak, and N. H. Beachley, *University of Wisconsin-Madison* (5, 2, p. 185) Article based on AIAA Paper 87-9090

B88-026 Current Gas Turbine Combustion and Fuels Research and Development. J. E. Peters, *University of Illinois at Urbana-Champaign* (4, 3, p. 193) Survey Paper

B88-027 Comparison of Computational Methods for Three-Dimensional Turbulent Turbomachinery Flows. K. R. Kirtley, M Warfield and B. Lakshminarayana, *Pennsylvania State University* (4, 3, p. 207) Synoptic based on AIAA Paper 86-1599

B88-028 Combustion Processes in Supersonic Flow. Frederick S. Billig, *The Johns Hopkins University* (4, 3, p. 209) Article

B88-029 Effects of Additives on the Microexplosion of Carbon Slurry Droplets. L. C. Clausen, T. X. Li and C. K. Law, *University of California, Davis* (4, 3, p. 217) Article

B88-030 Influence of Fuel Temperature on Atomization Performance of Pressure-Swirl Atomizers. X. F. Wang and A. H. Lefebvre, *Purdue University* (4, 3, p. 222) Article

B88-031 Calculation of Annular Nozzle Trisonic Flowfields by the Method of Characteristics. B. N. Wang and J. D. Hoffman, *Purdue University* (4, 3, p. 228) Article based on AIAA Paper 86-1519

B88-032 Vortex Shedding in High-Speed Compressor Blade Wakes. A. H. Epstein, J. B. Gertz, P. R. Owen and M. B. Giles, *Massachusetts Institute of Technology* (4, 3, p. 236) Article

B88-033 Complex Modal Balancing of Flexible Rotors Including Residual Bow. W. L. Meacham and P. B. Talbert, *Allied Signal Aerospace Company*; H. D. Nelson, *Arizona State University*; and N. K. Cooperrider, *Failure Analysis Associates* (4, 3, p. 245) Article based on AIAA Paper 87-1840 CP865

B88-034 Transonic Inlet/Nacelle Code. Ram Sinha, *Lockheed-California Company* (4, 3, p. 252) Article

B88-035 Mixing of an Underexpanded Rectangular Jet Ejector. Yeu-Chuan Hsia, *Rockwell International Corporation*; Anjaneyulu Krothapalli, *Flordia State University*; and Donald Baganoff, *Stanford University* (4, 3, p. 256) Article

B88-036 Three-Dimensional Flow in Deep Rotating Stall Cells of an Axial Compressor. K. Mathioudakis and F. A. E. Breugelmans, *von Kármán Institute for Fluid Dynamics, Belgium* (4, 3, p. 263) Article

B88-037 Rotation Effects on Axisymmetric Sudden-Expansion Flows. Ronald M. C. So and Saad A. Ahmed, *Arizona State University* (4, 3, p. 270) Article

B88-038 Ionization Relaxation Region in a Nonequilibrium Disk MHD Generator. Nobuhiro Harada, Hiroyuki Yamasaki, and Susumu Shioda, *Tokyo Institute of Technology, Japan* (4, 3, p. 277) Article

B88-039 Harmonic Analysis of Piston and Pyrotechnic Pulsers for T-burners. W. H. Beck and W. H. Jolley, *Department of Defence, South Australia* (4, 3, p. 283) Technical Note

B88-040 Computation of Three-Dimensional Transonic Inlet Flowfields Using an Approximate Factorization Algorithm. Takashi Nakamura, *National Aerospace Laboratory, Japan* (4, 3, p. 285) Technical Note

B88-041 Steady-State MPD Arc Thruster with a Permanent Magnet. Yoshihiro Arakawa and Akihiro Sasho, *University of Tokyo, Japan* (4, 3, p. 287) Technical Note

B88-042 PC-Based Data Acquisition Control System for Direct-Connect Test Stands. J. S. Lilley, *U.S. Army Missile Command, Redstone Arsenal;* and W. J. Burlingame, *Boeing Aerospace Company* (4, 4, p. 289) Synoptic based on AIAA Paper 87-1793

B88-043 Numerical Navier-Stokes Solutions of High-Speed Propeller Flows. S. J. Yoon and J. A. Schetz, *Virginia Polytechnic Institute and State University* (4, 4, p. 291) Synoptic based on AIAA Paper 86-1538

B88-044 Spray Characteristics of Aerated-Liquid Pressure Atomizers. A. H. Lefebvre and X. F. Wang, *Purdue University*; and C. A. Martin, *Parker Hannifin Corporation* (4, 4, p. 293) Article based on AIAA Paper 87-0063

B88-045 Experimental and Theoretical Study of a Monodisperse Spray. J. E. Kirwan, T. A. Lee, G. N. Schroering, H. Krier, J. E. Peters, J. P. Renie, and K. Kim, *University of Illinois at Urbana-Champaign* (4, 4, p. 299) Article based on AIAA Paper 87-1955

B88-046 Pulsed Instability in Rocket Motors: A Comparison Between Predictions and Experiments. Joseph D. Baum and Jay N. Levine, *Air Force Rocket Propulsion Laboratory/DYCR, Edwards AFB;* and Richard L. Lovine, *Aerojet Tactical Systems* (4, 4, p. 308) Article based on AIAA Paper 84-0290

B88-047 Structural Behavior of the Space Shuttle SRM Tang-Clevis Joint. William H. Greene, Norman F. Knight Jr. and Alan E. Stockwell, *NASA Langley Research Center* (4, 4, p. 317) Article

B88-048 Mixing Characteristics of a Ducted Elliptical Jet. K. C. Schadow, E. Gutmark, K. J. Wilson and D. M. Parr, *U.S. Naval Weapons Center* (4, 4, p. 328) Article

B88-049 Electrothermal Propulsion of Spacecraft with Millimeter and Submillimeter Electromagnetic Energy. L. L. Frasch, R. Fritz and J. Asmussen, *Michigan State University* (4, 4, p. 334) Article

B88-050 Experimental and Numerical Investigation of a Propeller with Three-Dimensional Inflow. Joseph A. Schetz, *Virginia Polytechnic Institute and State University;* Dominique Pelletier, *École Polytechnique de Montréal, Canada;* and David A. Mallory, *Virginia Polytechnic Institute and State University* (4, 4, p. 341) Article based on AIAA Paper 87-0607

Errata (4, 5, p. 478)

B88-051 Forced Mixer Lobes in Ejector Designs. Walter M. Presz Jr. and Bruce L. Morin, *United Technologies Research Center;* and Robert G. Gousy, *Western New England College* (4, 4, p. 350) Article based on AIAA Paper 86-1614

B88-052 Calculation of Unsteady Wake/Rotor Interaction. Michael B. Giles, *Massachusetts Institute of Technology* (4, 4, p. 356) Article based on AIAA Paper 87-0006

B88-053 Performance Experiments with a Shock-Tunnel-Driven Argon-Cesium MHD Disk Generator. Abraham Veefkind, Plamen Karavasilev and Wang Dalun, *Eindhoven University of Technology, the Netherlands* (4, 4, p. 363) Article

B88-054 Double-Multiple Streamtube Model for Studying Vertical-Axis Wind Turbines. Ion Paraschivoiu, *École Polytechnique de Montréal, Canada* (4, 4, p. 370) Article

Errata (4, 5, p. 478)

B88-055 Influence of Design Concept and Liquid Properties on Fuel Injector Performance. J. R. Custer and N. K. Rizk, *General Motors Corporation* (4, 4, p. 378) Article based on AIAA Paper 86-0453

B88-056 Combustion-Generated Turbulence in Practical Combustors. D. R. Ballal, *University of Dayton* (4, 5, p. 385) Article based on AIAA Paper 87-1721

B88-057 Modeling of a Hollow-Cone Liquid Spray Including Droplet Collisions. J. P. Asheim, J. E. Kirwan and J. E. Peters, *University of Illinois at Urbana-Champaign* (4, 5, p. 391) Article

B88-058 LDV Measurements of Axial Drop Velocity in Evaporating, Dense Sprays. P. G. Felton, B. Chehroudi and F. V. Bracco, *Princeton University;* and Y. Onuma, *Toyohashi University of Technology, Japan* (4, 5, p. 399) Article

B88-059 Experimental and Theoretical Effects of Nitrogen Gas Flow Rate on Liquid-Jet Atomization. Robert D. Ingebo, *NASA Lewis Research Center* (4, 5, p. 406) Article

B88-060 Numerical Model for Pellet-Dispersion Igniter Systems. D. R. Greatrix and J. J. Gottlieb, *Institute for Aerospace Studies, University of Toronto, Canada*; and T. Constantinou, *Defense Research Establishment Valcartier, Canada* (4, 5, p. 412) Article

B88-061 Thrust Modulation in Hybrid Rocket Engines. W. Waidmann, *DFVLR, Lampoldshausen, FRG* (4, 5, p. 421) Article

B88-062 Current Distribution and Plasma Acceleration in MPD Arcjets with Applied Magnetic Fields. Masafumi Tanaka and Itsuro Kimura, *University of Tokyo, Japan* (4, 5, p. 428) Article

B88-063 Stability of Rotors in Compressible Fluid-Film Bearings. G. L. Agrawal, *United Technologies Corporation* (4, 5, p. 437) Article based on AIAA Paper 87-1841

B88-064 Control of Rotor Aerodynamically Forced Vibrations by Splitters. Sanford Fleeter, *Purdue University*; Daniel Hoyniak, *NASA Lewis Research Center*; and David A. Topp, *Purdue University* (4, 5, p. 445) Article based on AIAA Paper 86-0844 CP863

B88-065 Analysis of Rotor Tip Clearance Loss in Axial-Flow Turbines. Saeed Farokhi, *University of Kansas* (4, 5, p. 452) Article

B88-066 Wake-Induced Unsteady Aerodynamic Interactions in a Multistage Compressor. Vincent R. Capece and Sanford Fleeter, *Purdue University* (4, 5, p. 458) Article based on AIAA Paper 86-1455

B88-067 Electric Arc Behavior in a Boundary Layer. Richard Rosa, *Montana State University*; Larry Farrar and Dan Trudnowski, *Mountain States Energy* (4, 5, p. 466) Article

B88-068 Aerodynamic Analysis of the Darrieus Wind Turbines Including Dynamic-Stall Effects. Ion Paraschivoiu and Azeddine Allet, *École Polytechnique de Montréal, Canada* (4, 5, p. 472) Article based on AIAA Paper 87-9373

B88-072 Numerical Study of the Interactions Between Droplets at Intermediate Reynolds Numbers. Jian-Shun Shuen, *NASA Lewis Research Center* (4, 6, p. 481) Article based on AIAA Paper 87-0137

B88-073 Representation of Average Drop Sizes in Sprays. Lee G. Dodge, *Southwest Research Institute* (4, 6, p. 490) Article

B88-074 Simple Finite-Element Model of O-Ring Deformation and Activation During Squeeze and Pressurization. M. Salita, *Morton Thiokol, Inc.* (4, 6, p. 497) Article based on AIAA Paper 87-1739

B88-075 Optimization of Electric Propulsion Systems Considering Specific Power as Function of Specific Impulse. M. Auweter-Kurtz, H. L. Kurtz, and H. O. Schrade, *University of Stuttgart, FRG* (4, 6, p. 512) Article

B88-076 Future Spacecraft Propulsion. P. W. Garrison and J. F. Stocky, *Jet Propulsion Laboratory, California Institute of Technology* (4, 6, p. 520) Article based on AIAA Paper 86-1198 CP866

B88-077 Onset in Magnetoplasmadynamic Thrusters with Finite-Rate Ionization. V. V. Subramanian and J. L. Lawless, *Carnegie Mellon University* (4, 6, p. 526) Article based on AIAA Paper 87-1068

B88-078 Three-Dimensional Laser Velocimeter Investigation of Turbulent, Incompressible Flow in an Axisymmetric Sudden Expansion. G. L. Morrison, G. B. Tatterson, and M. W. Long, *Texas A & M University* (4, 6, p. 533) Article

B88-079 Turbine-Stage Heat Transfer: Comparison of Short-Duration Measurements with State-of-the-Art Predictions. William J. Rae and Dale B. Taulbee, *Calspan-UB Research Center;* Kestutis C. Civinskas, *NASA Lewis Research Center;* and Michael G. Dunn, *Calspan-UB Research Center* (4, 6, p. 541) Article based on AIAA Paper 86-1465

B88-080 Two-Dimensional Numerical Analysis for Inlets at Subsonic Through Hypersonic Speeds. R. H. Bush, P. G. Vogel, W. P. Norby and B. A. Haeffele, *McDonnell Douglas Corporation* (4, 6, p. 549) Article based on AIAA Paper 87-1751

B88-081 Highly Compact Inlet Diffuser Technology. R. H. Tindell, *Grumman Corporation* (4, 6, p. 557) Article

B88-082 Navier-Stokes Analysis for High-Speed Flows Using Pressure Correction Algorithm. Chae M. Rhie, *United Technologies Corporation*; and Steven T. Stowers, *Pratt & Whitney Aircraft* (4, 6, p. 564) Article based on AIAA Paper 87-1980

B88-083 Laser Velocimetry Measurements at the Diffuser Exit of a Coal-Fired MHD Channel. W. W. Wilson, D. V. Srikantaiah, W. S. Shepard and R. L. Cook, *Mississippi State University* (4, 6, p. 571) Article based on AIAA Paper 87-1275

B88-084 Prediction of Leakage Mass Flow Rate Through Gas Springs. Roberto Bruno Bassio and Vincenzo Naso, *University degli Studi di Roma La Sapienza, Italy;* Marian Cichy and Boleslaw Pleszewski, *Technical University of Gdansk, Poland* (4, 6, p. 577) Article based on AIAA Paper 87-9345

B88-085 Direct Optimization Method for Estimation of Supersonic Flow Turbine Stator Profiles. Rhonald M. Jenkins and John A. Hatfield, *Auburn University* (4, 6, p. 580) Article

B88-086 Dendritic Web Silicon Solar Cells. D. L. Meier and R. H. Hopkins, *Westinghouse Research and Development Center*; and R. B. Campbell, *Westinghouse Advanced Energy Systems Division* (4, 6, p. 586) Article

B88-087 Laser-Induced-Fluorescence Visualization of Transverse Gaseous Injection in a Nonreacting Supersonic Combustor. J. C. McDaniel and J. Graves Jr., *University of Virginia* (4, 6, p. 561) Article based on AIAA Paper 86-0507

B88-088 Second Solution and the Second Law. Joseph V. Foa, *George Washington University* (4, 6, p. 568) Technical Note
